Projects

Clean Compass

- Designed and developed an easy-to-use user-friendly website, which is designed to resource
- users on clean energy solutions
- Curated content to guide users in choosing the right solar panel and introduce them to affordable,
- clean energy options.
- Technologies used - Html, Css and javascript
- **Github repositories :** https://nishitaupreti.github.io/The-Clean-Compass/

Ultrasonic Radar Using Arduino   Oct'2024

- Developed an ultrasonic radar system using Arduino for a electronics and engineering (ECE) project
- Designed and programmed the device to detect objects and measure distances in real time, utilising ultrasonic sensors and data visualisation
- Demonstrated skills in electronics, programming, and problem-solving
- Technologies Used- C++ and javascript
- **Github repository :** https://github.com/NishitaUpreti/Arduino

Parking Spot booking website | Html, CSS, Java Script   Sept'2024

- Developed an e-booking website wherein users can book parking spots and get tickets online
- Technologies Used- Html, Css and javascript
- **Github repository :** https://nishitaupreti.github.io/Parking-Spot/

Certificates

Time Management Course   Aug'2022
Master Union — *Certificate Link*

Technical Skills

Languages : Python

Technologies/Frameworks: HTML, CSS

Skills: Problem-Solving, Time management

Extra Curricular Activities

- Participated in **Drive Dev Hackathon** Held at Lovely Professional University - Certificate link   *Sept'2024*
- Participated in **Arena Hackathon** organised by Division of Youth Affairs, Student Welfare Wing, held at
- Lovely Professional University - Certificate link   *Sept'2024*
